CLEANER EV

● *SUMMARY*

WATER BASE, DEGREASING DRESSER FOR ALL TYPES OF SYNTHETIC MATERIAL FOR UPPERS AND SOLES.

● *CHARACTERISTICS*

CLEANER EV is a water base solution of special additives, which cleans and renews all types of synthetic materials for uppers and soles. Particularly efficient as cleaner on EVA and TPU soles both white and coloured. It can also be used as cleaner for some type of leathers for uppers and it is particularly efficient on leather with special finishing as resin and rubber effect.

● *APPLICATION*

- **CLEANER EV** has to be applied onto sole or upper by a cotton fabric, synthetic sponge or little brush
- it dries quickly
- it doesn't demand any further working process

● *COLOURS*

LFS001 Neutral

● *SOLVENTS*

● *STORAGE*

The expire date of the product shown on the label is valid for products if kept away from direct heat and cold and at standard storage conditions (minimum temperature 4°C to maximum 40°C). Exceeding the expiration date does not necessarily mean that the product no longer meets the specifications or values set. However, before using this product after the expiration date, Kenda Farben recommends checking whether it still meets the reference specifications or values. Kenda Farben will not be in any way responsible for failure to comply with specifications or values set after the deadline or due to incorrect storage that can shorten the life of the product.

This information is to the best of our knowledge true and accurate. However, all recommendations or suggestions are made without guarantee, since the conditions of use are beyond our control.
