

SPAZZOLATO H

● SUMMARY

ALL-PURPOSE WATER BASE FINISH USED TO OBTAIN ANTIQUE-STYLE TWIN-COLOUR EFFECTS ON SOLES AND HEELS IN ALL SYNTHETIC MATERIALS

● CHARACTERISTICS

SPAZZOLATO H is a water base finish for special effects: brushed twin-colour, antique-aged, “mold” effect and twin-colour brush-on finishing.

Thanks to its special formulation, it allows to finish the TR rubber applying **SPAZZOLATO H** directly on the material or as finish on a covering base (AQUAVER TR).

Depending on intensity of brushing, its ease application and brushing allows to obtain marked or homogeneous effects.

SPAZZOLATO H is available in a very wide range of finishes and color effects.

● APPLICATION

– **SPAZZOLATO H** is applied by manual spraying or with suitable equipment, directly onto TR soles or heels or on the covering base AQUAVER TR

– **SPAZZOLATO H** is applied by spray-gun (pressure 4.5 - 6 atm, 0.7 - 1.2 nozzle), either manually or by machine.

The product must be nebulised very well (if the application of **SPAZZOLATO H** is it too wet or abundant, then colour effect is not uniform)

– leave to dry completely in oven at 40 - 70°C (approx. 5 minutes) or at room temperature (at least 20 - 30 minutes)

– brush with rotating-cloth disk brush treated with **ABRALUX** wax **32800** (brush speed 800 rpm)

– by varying the brushing intensity, part of the surface layer is removed, to a greater or lesser extent, and the base color appears. Once the desired twin color intensity is obtained, the shine of the film can be increased by brushing with woolen brush treated with **CARNAUBA 32817** wax

● COLOURS

36201 Black

36202 Copper

other colors available
